Session Overview

Is implementing Oracle Cloud Grants on your roadmap or are you currently implementing? With any implementation, investing in data quality/clean up, change management, and integration planning can help reduce roadblocks for a successful go-live. However, the requirements and the business process for managing grants are especially complex. Therefore, we've put together a list of tips and tricks to help lay the foundation for an effective implementation, regardless of the system you are transitioning from.

Agenda

- Intros
- Oracle Cloud Grants Management Overview
- Tips and Tricks
- Other Helpful References
- Q&A

Transformative Combinations

— NOW PART OF MYTHICS —

In 2025, Mythics united three trusted Oracle partners to deliver expert Oracle solutions across SaaS, PaaS, IaaS, and on-premise, offering strategic guidance through to managed services and training. With national scale and deep expertise across industries, Mythics is your proven, long-term partner for digital transformation in even the most regulated environments.

SaaS Delivery Capabilities

Mythics consulting's primary focus is to modernize our client's business systems.

Mythics organic delivery capabilities currently support ERP, HCM, EPM and OPAL Oracle cloud applications as well as supporting services around PMO, OCM, Training and Managed Services. Mythics has a strong partner ecosystem to round out any opportunity specific needs.

Support Functions: PMO, OCM, Training, Integration

Oracle Cloud HCM

All HCM products including Core HR, Payroll, Benefits, Talent Management, Recruiting and Onboarding

Oracle Cloud EPM

All planning and budgeting applications and supporting products.

Oracle Cloud ERP

All Financial, Supply Chain, Project Portfolio Management and Procurement applications

Oracle Opal

The Oracle Permitting & Licensing product suite.

Oracle Cloud Grants Management Overview

.....

Oracle Cloud Grants Management Overview

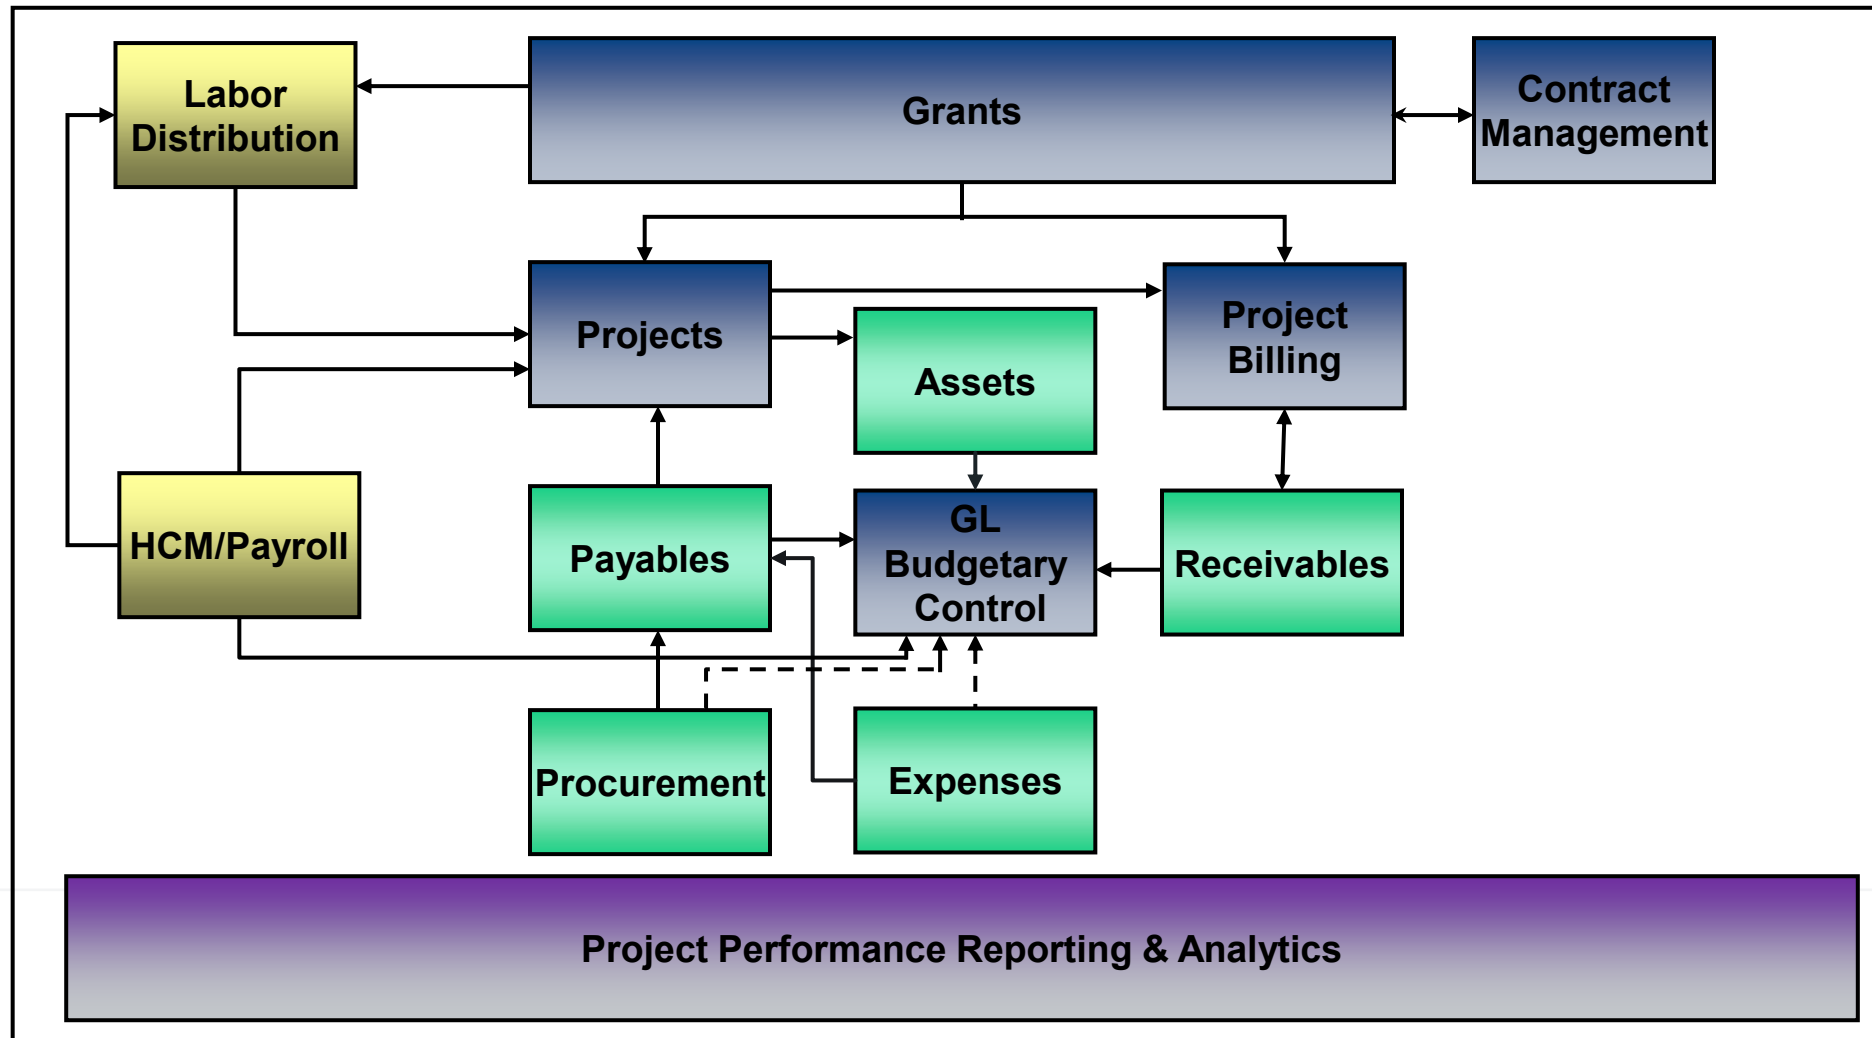

- **Manage awarded funds** from sponsors (federal, state, corporate, or private).
- **Ensure compliance** with grant regulations (e.g., federal Uniform Guidance).
- **Track spending vs. budget** across multiple funding sources.
- **Automate billing** and revenue recognition.
- **Simplify reporting** for internal and external stakeholders.
- **Integrate** with finance, procurement, HR, Payroll and project costing.

Oracle Cloud Grants Management Integration

Module	Purpose
Projects	Tracks project costs & tasks
Financials (GL/AP/AR/FA)	Core accounting functions
Procurement	Purchases against grants
Expenses	Employee reimbursements
HR/Payroll	Labor costing & effort reporting

Oracle Cloud Grants Management Integration

Tips and Tricks

Workflow Overview

- Oracle Cloud provides customizable workflow notification templates for the following commonly used tasks
 - Project Financial Plan Version Approval
 - Project Invoice Approval
 - Project Cost Adjustment Approval
 - Contract Approval
 - Requisition Approval
 - Payables Invoice Approval
 - Purchase Order and Journal Approvals

Extension to Cloud

- ▶ Customers can use Oracle Analytics Publisher add-in for word to extend standard notification templates

Workflow Enhancement

- **Problem Statement:** Standard delivered workflow notification templates often don't include information users need to review and approve transactions
- **Solution:** Extend standard workflow notification templates and data models to include additional details so that users have all the information they need to review and approve transactions

Billing Overview

- Award/Contract setup
- Contract bill plan/revenue plan
- Expense Capture/Distribution
- Generate revenue
- Generate invoices
- Transfer invoices to AR
- Accounting

Billing Automation Enhancement

- **Problem Statement:** Standard Generate Invoices Ess job allows users to submit the job for all eligible contracts within the same business unit and this can lead to loss of work for some departments that manage specific type of contracts
- **Solution:** Make the contract number mandatory for the standard Generate Invoices process and create a separate custom Ess process with making contract type mandatory so that users can only submit the process for their specific contracts

Reporting Overview

➤ Oracle Cloud Reporting Tools

- Oracle Transaction Business Intelligence (OTBI)
- BI Publisher
- Financial Reporting Studio
- Smartview (GL and PPM)

Account Analysis Report Enhancement using additional attributes and supporting references

- **Problem statement:** Standard account analysis report includes only limited attributes related to project costing journals and users need additional subledger attributes like award, project, task numbers to aid in reconciliation
- **Solution:** Use custom subledger line description rules and/or supporting references to capture additional details and extend standard account analysis report layout to include these details

Account Analysis Report - Enhanced

Supporting References Overview

- Supporting references are a powerful tool to capture transaction attributes in journal lines. You can use these tags to report on journal entries, reconcile entries back to subledgers, or even maintain balances at the attribute level.
- Supporting references can be defined using either of these options
 - With Balances
 - For balance sheet accounts, supporting reference balances are carried forward to the first period of the accounting calendar's year.
 - For Profit and Loss accounts, supporting reference balances are set to zero in the first period of the accounting calendar's year.
 - Data is available in Subledger Accounting – Supporting References Real Time subject area
 - Without Balances
 - Available for reporting in account analysis reports

Custom Report for control account balances across modules using supporting references

- **Problem Statement:** Some control accounts are used in various modules i.e. Projects, Receivables, and Fixed Assets and it's difficult to get a single view of the control account activity report across modules
- **Solution:** Define supporting references with balances and build dashboard reports using Subledger Accounting – Supporting References Real Time OTBI subject area with drill down capabilities

Security Best Practice

- Recommended practice is to copy the standard job roles as custom roles and use them to assign to users. This allows removal of any additional privileges and enables compliance with license audits
- Make sure to follow the same role naming conventions including case to avoid any issues with using department specific roles in workflow rules using dynamic syntax
- Test roles independently to ensure proper access

Grants Accountant

Search Result Count : 1

Name

Grants Accountant

Code

ORA_PJF_GRANTS_ACCOUNTANT_JOB

Description

Oversees the collection, recording, allocation, and analysis of award and project costs and revenue. Analyses budget and actual costs and prepares project profit and loss statements. Reports financial performance to project managers and executives. Prepares draft invoices, obtains approval from project managers, and transfers invoices to the Receivables application. Compiles billing support and backup documentation. Manages period or year-end closing procedures.

Oracle Time and Labor to PPM Delivered

- Employees and contingent workers can view and update the time cards that they create. Based on the setup, a time card either displays all projects in the time reporter's business unit or only those projects on which the time reporter is a team member.
- Project managers review and approve time card entries created for their projects. Project accountants import the time cards into Project Costing (including reviewing actual effort against planned effort), and potentially billing.

Oracle Time and Labor to PPM Enhancement

- Problem Statement: Out-of-the-Box functionality in OTL requires you to select an award and funding source. It does not currently utilize Funding Patterns – which allows you to define date effective rules on how costs are to be distributed amongst Awards & Funding Sources
- Solution: Utilize Oracle Integration Cloud (OIC) to apply Funding Pattern
