AI-Powered Cloud- What's New in Oracle OCI and PeopleSoft

P-051594

Quest Virtual Reconnect | October 2025

Session Overview

- The shift from cloud to AI-driven platforms
- What's new in the Oracle AI Database
- OCI as an intelligent infrastructure
- AI in PeopleSoft operations and UX
- Managed Services and compliance impact
- Practical steps to start today

About Mythics

Mythics brings together three of the most trusted Oracle partners—Mythics, SpearMC, and SmartERP—to bring you one expert partner across SaaS, PaaS, IaaS and on-premise.

Mythics is now a full Oracle systems integrator—your single partner for strategy, software licensing, implementation, managed services, and training. We're recognized as a trusted Oracle partner with deep expertise, national scale, and a decades-long track record of delivering outcomes with precision and reliability. We serve a diverse range of industries—including public sector, healthcare, higher education, and commercial enterprises, with a proven ability to navigate high-stakes, highly regulated environments. We're more than a vendor. We're your long-term partner for digital transformation.

Setting the Stage

AI is Transforming Not Just Applications, But Platforms

- Oracle has shifted from *AI for users* to *AI for systems*.
- Intelligent resource management, scaling, and optimization now happen automatically.
- The goal: eliminate manual tuning and infrastructure overhead.

AI

Why it Matters Now

Drivers for Change

- Systems and workloads are more complex than ever.
- Businesses need continuous optimization, not periodic upgrades.
- AI helps teams operate smarter without adding headcount.

Oracle AI Database 26ai

The world's first AI-native enterprise database.

Architecture

- Built-in vector search and embeddings for semantic AI.
- Agentic workflows operate directly inside the database.
- Unified support for relational, JSON, graph, and spatial data.

Data + Intelligence

- Keeps structured and unstructured data together, no data movement.
- Enables retrieval-augmented generation (RAG) and AI analytics.
- Simplifies compliance and security, AI operates inside the data boundary.

Future Ready

- 100% compatible with existing workloads.
- Provides an upgrade path, 23ai → 26ai with no recertification.
- Positions organizations for predictive insights and automation across ERP systems.

MYTHICS

Oracle AI Database 26ai turns your database into an AI platform, not just a data store.

Telemetry Collection
(Metrics, Logs, Events)

AI/ML Analysis (Anomaly
Detection & Forecasting)

Predictive Scaling
(Autoscale Policies,
Resource Tuning)

Automated Action (Scaling,
Optimization, Alerts)

Continuous Feedback
(Updated Performance Data)

OCI as an AI Platform

AI-Driven Infrastructure Management

- OCI uses AI for predictive autoscaling, tuning, and anomaly detection.
- Resource optimization improves performance and reduces cost.
- Integration with Autonomous Database and PeopleSoft Cloud Manager.

Why it Matters for PeopleSoft

Enabling Smarter PeopleSoft Analytics

- Simplifies integration with machine-learning models.
- Supports advanced reporting and anomaly detection.
- Positions PeopleSoft for future AI extensions.

AI is flowing through PeopleSoft

PeopleSoft: Automation and Monitoring

AI-Enhanced Operations in PeopleSoft

- Intelligent provisioning, patching, and refresh cycles.
- Environment health scoring and drift detection.
- Reduced manual effort for admins and DBAs.

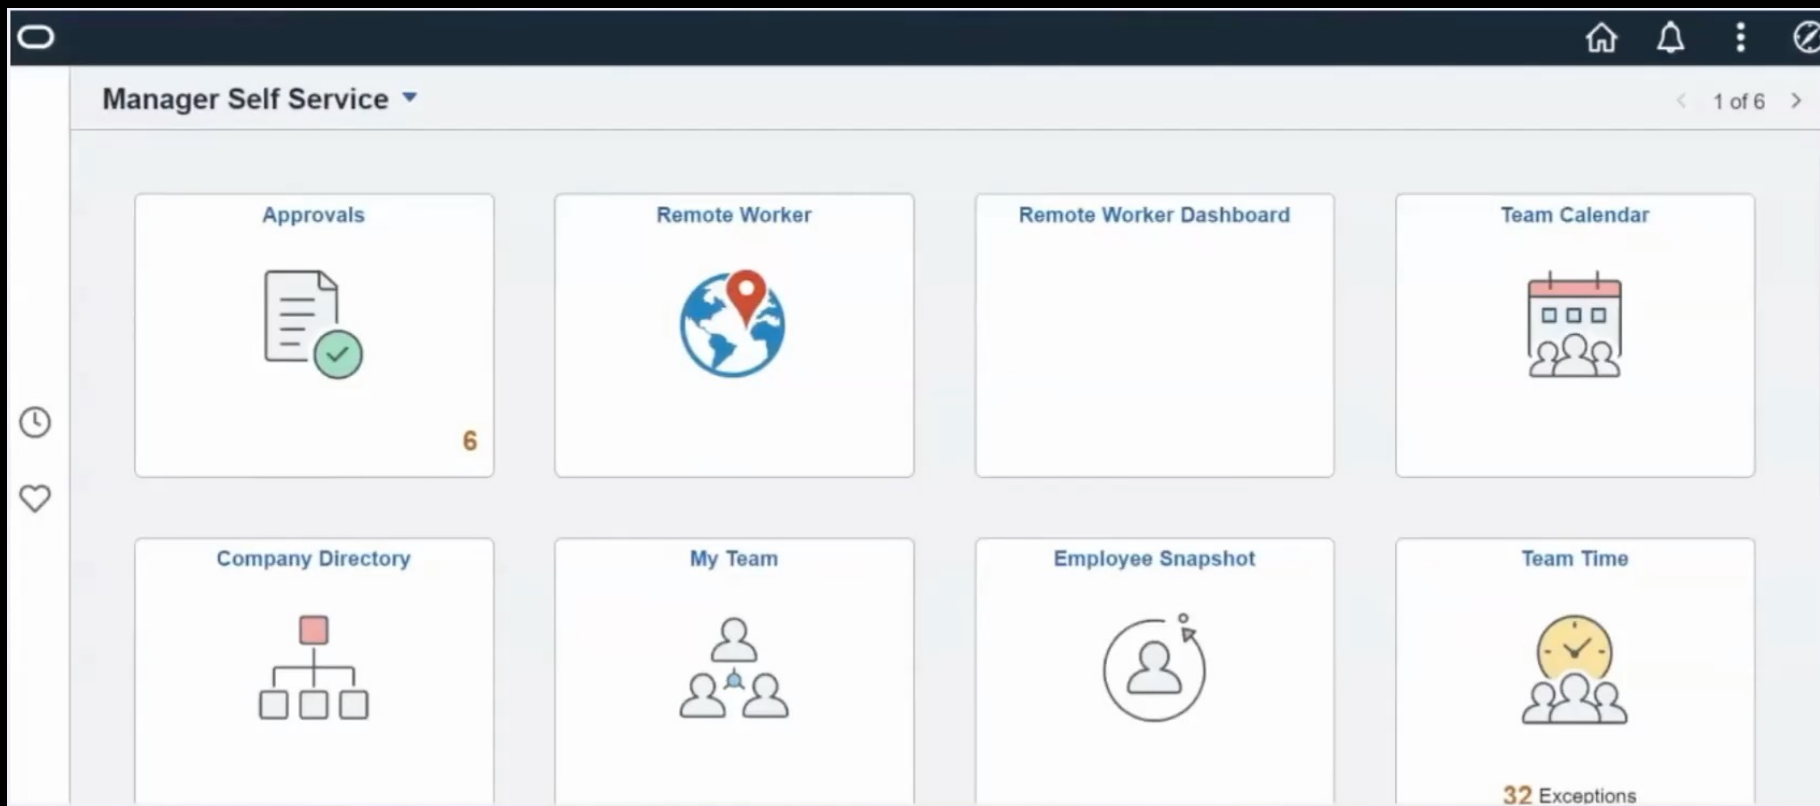

PeopleSoft: User Experience

AI-Augmented Interaction and Insights

- Natural-language queries for users and analysts.
- Personalization through predictive analytics.
- Recommendations for HR, Finance, and SCM tasks.

going to student.edu/advising for any class schedule issues.

ok great, could you also help me with my Student ID?

Sure, your Student ID is KU002. Is there anything else I can help you with?

ok thanks for that help

You're welcome! Is there anything else I can help you with?

what are my holds?

AI in Action at Mythics

From data centers to decision centers – we're applying AI wherever it drives smarter outcomes.

Where Mythics Applies AI

Applications

Operations

Internal Processes

Our Approach

- Composable: We use Oracle's AI capabilities as building blocks, not monoliths.
- Practical: Every pilot ties back to real business or operational value.
- Collaborative: What we learn internally, we bring to our customers.

Bringing AI to PeopleSoft Operations

Practical ways to add intelligence – wherever you run PeopleSoft

Monitoring & Compliance

- Use anomaly detection on process logs and telemetry to predict performance or security issues before they occur.
- Correlate audit logs and configuration changes with machine learning to flag drift and compliance risks.

Automation & Patching

- Apply generative AI to summarize PUM updates and PeopleTools patch impacts for faster analysis.
- Use agents to automate validation steps and recommend next actions during patching cycles.

Insights and Support

- Enable natural-language queries so users can ask questions about PeopleSoft data — no reports or SQL required.
- Deploy AI copilots that summarize service tickets and suggest likely resolutions to support teams.

MYTHICS

You don't have to move PeopleSoft to use AI

Your Path to AI-Driven PeopleSoft

Start where you are. Grow as you learn.

Explore

Something you wish “just worked smarter”.

Pilot

Test a lightweight AI model or agent.

Expand

Scale what works!

SMART ERP
Solutions

You don't need an AI strategy to start; you just need a first success story.

Start Where You Are

AI for PeopleSoft isn't about replacing what works, it's about making it smarter.

- Every PeopleSoft team can take a first step, one that saves time, reduces risk, and builds confidence.
- The hardest part isn't knowing what to do. It's believing you can start now.
