

TESTING AS A SERVICE

GET CURRENT. STAY CURRENT.

So you made it to the latest version of PeopleSoft. But are you current with the latest "image" update? That's the question PeopleSoft Enterprise customers are facing. Oracle is releasing thousands of new features and functions, bundled frequently into PeopleSoft Upgrade Manager Images (PI). Staying current requires analyzing and testing each PI to evaluate if and how it fits within your organization — a time-consuming and tedious task.

SpearMC's Testing as a Service (TAAS) solution enables PeopleSoft Enterprise customers to focus on their core business, while reducing internal testing support efforts. With our on-demand and subscription TAAS plans, your organization can reduce the time and effort required to stay current, while improving the quality of your PeopleSoft Financials, Supply Chain and HCM systems.

TAAS OFFERINGS

	Basic On Demand	Deluxe Subscription	Platinum Subscription
PI Evaluation Report	Cost per request	Included	Included
PI Strategy	Not Included	Included	Included

CONSISTENT AND AUTOMATED.

TAAS ALLOWS YOU TO:

- Outsource testing and PI evaluation activities to SpearMC's PeopleSoft experts
- Replace manual testing with test automation for Unit, Systemic, Integration and Regression testing
- Reduce effort/cost of PI and regular enhancement project regression testing
- Save time for functional SMEs by replacing routine, manual testing with automated scripts
- Easily migrate automated test cases across environments
- Evaluate test results and PI reports to make informed decisions and stay current
