

## PeopleSoft 9.2 Foundations

### Financial Supply Chain Management (FSCM)

The one-day PeopleSoft 9.2 Foundations for Financials and Supply Chain Management (FSCM) course introduces participants to basic concepts used in the PeopleSoft FSCM modules.

Participants will learn about the foundation of PeopleSoft applications, how to navigate the menu structure and personalize content, how data tables are structured and explore various methods of navigating through PeopleSoft FSCM applications. Exercises in scheduling and running reports and processes enhance the learn experience and familiarize participants with the Process Monitor.
