Agenda

PeopleSoft 9.2 Security Technical

2-Day Course

SPEARMC IS NOW MYTHICS®

PeopleSoft Security Technical

Developed for PeopleTools Developers, Analysts and System Administrators, PeopleSoft PeopleTools Security training quickly introduces students to the PeopleSoft application security in FSCM/HCM. Through scenarios, real-world experiences from implementers, and hands-on activities, students learn how to define, administer, and maintain security for PeopleSoft applications.

Prequisites:

- PeopleSoft 9.2 Foundations
- PeopleTools Knowledge

Technology Overview

- Secure by default
- Security in PIA
- Development security
- Application security
- Transaction audits
- Data encryption and digital certificates
- Batch and query security
- Signon and portal security
- Maintaining users across multiple databases

Information Security

- Information security
- Four security levels
- Design and implement PeopleSoft security

Login Process

- PeopleSoft Login Process

Passwords

- NIST's New Password Rule Book

User Profiles

- Create user profiles
- Copy user profiles

Roles

- Create roles
- Copy roles
- Delete roles

Permission Lists

- The elements of application security
- Create permission lists
- Copy permission lists
- Delete permission lists

Portal

- Describe portal registry security
- Maintain portal registry security
- View portal security details

Batch/Process Security

- Process Security
- Batch Security: Process Groups
- Batch Security: Process Profile
- Batch Security Visualized

SPEARMC IS NOW MYTHICS®

PeopleSoft Security Technical

Tools Access

- Permission Lists: PeopleTools
- Tools Permissions: Upgrade
- Permissions: Definition Security

Tips and Tricks

- Troubleshooting Security
- Security Strategy and Considerations
- Best Practice: Cloning Permissions
- Portal and Fluid: A quick tour

Query Security

- Query Security Overview
- Defining Query Capabilities
- Creating Query Profiles
- Defining Records for Query Access
- Creating Query Access Groups
- Query Access Groups
- Query Security Overview
- Creating Query Profiles
- Implement row-level security

Mass Changes

- Deleting User Profiles
- Purge Inactive User Profiles
- Data Mover and Security

WorkCenter Security

- WorkCenter Security

Activity Guide Security

- Activity Guide Security

Changes PS System Passwords

- Changing PS System Passwords
- Row-Level Security
- Row-Level Security
- HCM/FSCM Row-Level Security
- Query Security Record

Security Auditing

- Security Auditing

Migrating Security

- Migrating Security
- Migrating Security - Delivered Data Mover Scripts
- Migrating Security – FSCM User Preferences
- Security Tools Tables

Recommended Courses

- PeopleTools I&II Accelerated
- Portal Technologies
