TESTING GROUNDS

Simplify PeopleSoft Test Framework

PeopleSoft Test Framework (PTF) automates much of the testing and evaluation associated with implementing Oracle updates, but it can be difficult to use, especially for non-technical teams. SpearMC's Testing Grounds solution makes PTF easier for anyone to use and fills gaps so your team can get even more value out of the tool.

Why Add Testing Grounds to PTF?

SpearMC's Testing Grounds solution removes uncertainty and enables quick implementation without sacrificing quality. Benefits include:

- **Ease of Use:** Functional users can effortlessly run, save, and view tests.
- **Reporting:** Generate reports with detailed data to resolve issues and maintain compliance.
- **Dashboards:** View test status at any moment in time, then drill down for details.
- **No Tool Switching:** Define and run test cycles in Testing Grounds without having to open PTF.
- **Straightforward Implementation:** Bolt on Testing Grounds, and get started quickly.

More Value in Less Time

Testing Grounds includes several helpful features that make PTF faster, easier to use, and more valuable to your team.

- Dashboards
- Execution Logs
- Error Screenshots
- Evidence Reports
- Data Management
- Test Cycle Definition
